PROFILE SUMMARY

- Product Designer with **4+ years of experience designing scalable SaaS platforms, B2B systems, dashboards, and mobile applications** across fintech, EdTech, e-commerce, and inventory management products.
- Specialized in **product strategy, information architecture, user journeys, workflow simplification, and design systems**, translating complex product requirements into intuitive and high-impact user experiences.
- Highly proficient in **Figma, high-fidelity prototyping, and cross-functional collaboration with product managers and engineers** to deliver production-ready interfaces. Known for combining **product thinking, UX strategy, and strong visual design** to build products that are both usable and scalable.
- Working knowledge of **HTML and CSS**, enabling effective design-to-development collaboration and implementation-ready UI design.

CORE COMPETENCIES

- **Product & UX Design:**
User Experience (UX) Design, User Interface (UI) Design, Product Design, Wireframing, Prototyping, Interaction Design, Responsive Design, Scalable Design Systems, User-Centered Design, End-to-End Product Design
- **Research & Strategy:**
User Research, Usability Testing, Information Architecture, User Flows, Persona Development, Data-Driven Design Decisions, User Journey Mapping, Product Requirement Document (PRD) documentation.
- **Tools & Technologies:**
Figma, Adobe XD, Adobe Creative Suite, Visual Studio Code, Codepen, Trello, ClickUp, and Microsoft Project.
- **Front-End Collaboration:**
HTML5, CSS3, Responsive Web Design, Developer Handoff, Design Feasibility Analysis, Developer handoff & implementation support, Agile / Scrum, Cross-Functional Collaboration.

PROFESSIONAL EXPERIENCE

Product Designer (Hybrid Role)

Morgen Green Limited, Bayview Estate, Lekki, Lagos State

Oct 2025 – Present

- Lead **end-to-end product design** for SaaS and EdTech platforms, including dashboards, analytics tools, and administrative interfaces.
- Design **user journeys, workflows, and information architecture** to support complex product interactions and decision-making processes.

- Produce **wireframes, high-fidelity interfaces, and interactive prototypes** using Figma.
- Build and maintain **scalable design systems and reusable component libraries**.
- Collaborate closely with **engineers, product managers, and stakeholders** to align UX decisions with product strategy and business goals.
- Create **Product Requirement Documents (PRDs), user flows, and design documentation** to guide product development.
- Ensure smooth **developer handoff and implementation support** during product delivery.

Product Designer (Remote)

Ajiroba Technologies Limited, Arepo, Ogun State

Nov 2023 – Sept 2025

- Designed and launched for a **B2C e-commerce platform** serving users across web and mobile applications.
- Conducted **UX audits and usability optimization**, improving platform usability and perceived performance by **30%**.
- Designed **dashboards, user flows, and high-fidelity interfaces** aligned with business and user needs.
- Simplified complex product workflows, improving **navigation clarity and feature adoption**.
- Built and maintained a **scalable design system in Figma** to support consistent UI across the product.
- Worked closely with developers to ensure **implementation-ready UI designs and efficient design handoff**.

Product Designer (Remote)

Creatiff, Lagos State

March 2022 – Oct 2023

- Designed a **mobile-first fashion e-commerce application**, leading the full design lifecycle from research to implementation.
- Conducted **UX research, user journey mapping, and interaction design** to improve product usability.
- Created **wireframes, high-fidelity UI, and interactive prototypes** using Figma.
- Built a **component-based design system** to support product scalability.
- Improved **onboarding and checkout user flows**, increasing user satisfaction by **15%**.
- Collaborated with cross-functional teams to iterate on features based on **user feedback and analytics insights**.

PRODUCT IMPACT

- Improved SaaS platform usability through UX optimization and workflow simplification, increasing perceived performance by 30%
- Redesigned onboarding and checkout flows for a mobile e-commerce platform, improving user satisfaction by 15%

- Reduced operational errors in an inventory management system by redesigning navigation structure and dashboard workflows
- Improved design-to-development efficiency by implementing structured design systems and reusable UI components

EDUCATION

B.Sc., Civil Engineering – Obafemi Awolowo University, Ile-Ife

Second Class Upper – 4.09 CGPA | 2019

OND, Civil Engineering – Moshood Abiola Polytechnic

Upper Credit – 3.28 CGPA | 2012

CERTIFICATES

Google UX Design Process: Empathize, Define, and Ideate

Google | 2023

UI/UX with Adobe XD and Figma

AQSkills | 2023

Foundation of Project Management

Google | 2022

Google Foundations of User Experience (UX) Design

Google | 2022

Product Design (UI/UX Design)

Future Academy Africa | 2022

Project Management Essentials

Certificate Management Strategy & Institutes | 2021
