PROFILE SUMMARY

I turn complex product requirements into interfaces people navigate effortlessly - then build them in code and validate them with data. **Product Designer with 4+ years** across SaaS (Software-as-a-Service), EduTech, fintech, and e-commerce, working end-to-end from product strategy and design systems through to functional frontend (HTML, JavaScript/CSS) and analytics (SQL, Power BI). My design work has lifted usability by up to **40%** and user satisfaction by **15%**; I'm known for cohesive design systems that keep cross-functional teams shipping fast.

CORE COMPETENCIES

- **Product & UI/UX Design:**

Product Design, User Experience (UX) Design, User Interface (UI) Design, Wireframing, Prototyping, Interaction Design, Responsive Design, Scalable Design Systems, Information Architecture, User Flows, User Journey Mapping, User Research, Usability Testing, Persona Development, Product Requirement Documents (PRDs)

- **Data Analytics:**

SQL, Microsoft Excel (Advanced), Power BI, Data Cleaning, Data Modelling, Exploratory Data Analysis, Data Visualization, Dashboard Development, Data-Driven Decision Making.

- **Frontend Development:**

HTML5, CSS3, JavaScript, Interactive Prototyping, Responsive Web Design, Design-to-Code Implementation, Version Control (G\GitHub)

- **Tools & Platforms:**

Figma, Adobe XD, Adobe Creative Suite, Visual Studio Code, Git/GitHub, Trello, ClickUp, Microsoft Project

- **Collaborations:**

Agile / Scrum, Developer Handoff, Cross-Functional Collaboration, Stakeholder Communication, Design Feasibility Analysis

PROFESSIONAL EXPERIENCE

Product Designer (Hybrid)

Morgen Green Limited, Bayview Estate, Lekki, Lagos State

Oct 2025 – Present

- Lead end-to-end product design for SaaS and EduTech platforms - dashboards, analytics tools, and admin interfaces-from strategy through design delivery.
- Design user journeys, workflows, and information architecture that make complex decision-making feel simple for the end user.

- Design interactive interfaces in Figma, carry designs from Figma to working frontend, and remove handoff back-and-forth.
- ▪Create and maintain scalable design systems and reusable component libraries that keep UI consistent and speed up delivery across products.
- ▪Author PRDs (Product Requirement Documents), user flows, and design documentation that keep design and engineering aligned.
- Partner with engineers, product managers, and stakeholders to tie UX decisions to product strategy and business goals.

Product Designer (Remote)

Ajiroba Technologies Limited, Arepo, Ogun State

Nov 2023 – Sept 2025

- Designed and launched a **B2C e-commerce platform** serving users across web and mobile applications.
- Ran UX audits and usability optimization that improved platform usability and perceived performance by **30%**.
- Simplified complex product workflows, improving navigation clarity and feature adoption
- Partnered with developers to ship implementation-ready UI and efficient design handoff.
- Built and maintained a **scalable Figma design system to ensure** consistent UI across the product.
- Worked closely with developers to ensure **implementation-ready UI designs and efficient design handoff**.

Product Designer (Remote)

Creatiff, Lagos State

March 2022 – Oct 2023

- Designed a **mobile-first fashion e-commerce application**, leading the full design lifecycle from research to implementation.
- Ran UX research, user journey mapping, and interaction design to sharpen product usability.
- Created **wireframes, high-fidelity UI designs, and interactive prototypes in Figma**.
- Built a **component-based design system** to support product scalability.
- Improved **onboarding and checkout user flows**, increasing user satisfaction by **15%**.
- Collaborated with cross-functional teams to iterate on features based on **user feedback and analytics insights**.

KEY PROJECTS

- **Ledger Studio — Luxury Invoice Generator** (Design & Frontend)
 - Designed and developed a polished, no-backend invoicing suite using client-side state (localStorage / URL-encoded data) for a fast, install-free experience
- **AnnySHub - Retail showroom website** (Design & Frontend)
 - Designed and developed a polished, website for annyshub. This includes 2 users, the client and admin interface.

- **Retail & Admissions Analytics - Excel · SQL · Power BI** (Data Analytics)
 - Built end-to-end analytics pipelines on retail and admissions datasets: cleaned and modelled data, wrote SQL queries, and delivered interactive Power BI dashboards to support decision-making.
- **My Portfolio - professional portfolio** (Design & Frontend)
 - Designed and developed a polished, no-backend invoicing suite using client-side portfolio for all my job applications

EDUCATION

B.Sc., Civil Engineering – Obafemi Awolowo University, Ile-Ife

Second Class Upper – 4.09 CGPA | 2019

OND, Civil Engineering – Moshood Abiola Polytechnic

Upper Credit – 3.28 CGPA | 2012

CERTIFICATES

Frontend Development	TS Academy 2026
Data Analytics	Data Academy 2026
